

Our work packages

**Talk to us at
poster 1**

Enhance

Multidisciplinary work with appropriate biomedical data science support. Building resilient collaborative teams and careers

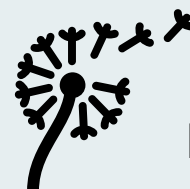

Nurture

Propagate best research practices among non-specialists with short accessible training

Analyse

Evaluate postgraduate taught training provision

Legacy

Reskill

Mentor programme for those seeking to retrain in data science

Inspire

Promote data careers to secondary school pupils with hands-on experience. Build a better understanding of barriers. Provide transferable skills to PG students
